Stainless steel surcharge – New adjustment

Dear Sir/s, dear Madam/e,

As we already advised on our latest information letter (during march), there is still a constant price increase for the Stainless Steel (AISI 316) raw material.

The surcharge for this material is still increasing every month.

We are really sorry, but we have no other possibility to cover this new increasing, a part of this new level has to be forwarded to all our customers.

Please note that we have to adjust our surcharge again.

All deliveries starting from 3rd May, 2010 will be invoiced with the new surcharge of 9%.

We also get information (not official figures yet) by the material producers that this price increase will continue during the next months, therefore we already expect a new surcharge adjustment beginning of June.

We keep you informed about this progress.

Thank you in advance for your understanding regarding this negative development (we really have no influence on this world wide effect).

Sincerely yours,

Markus Luible
